

A large, stylized graphic of multiple overlapping, wavy lines in various shades of blue, ranging from light sky blue to dark navy blue. The lines flow from the top left towards the bottom right, creating a sense of movement and depth.

Global Commitments & Responsibilities

Quality Statement

CrossChem will provide its customers with quality products and services that meet or exceed their expectations. We will continuously strive to improve our process, products and services using state of the art technology and employing well trained and highly motivated people.

Jeff Weeks
CEO

About CrossChem

CrossChem Limited is part of The Cross Group family of companies with operating entities in USA and China. CrossChem launched in 2001 as a spin-off of a Rohm and Haas Company product line following the 1999 acquisition of Morton International.

We utilize proprietary chemistries and process technologies to produce low volume, high value specialty chemicals utilizing third party manufacturing assets. Each product represents challenging, next-generation technologies implemented across a global manufacturing footprint.

Sold under the GlyAcid® and HiPure™ brands, CrossChem products facilitate today's clean chemistry, high purity profile requirements. Our products serve the aerospace, personal care, pharmaceutical, medical products, electronic materials, polymer and other purity-sensitive industries and markets.

Manufacturing Excellence

CrossChem products are produced in third party manufacturing facilities incorporating CrossChem proprietary chemistries and process technologies. Our plants are ISO certified and/or are audited to meet cGMP/FDA regulatory standards.

We utilize three manufacturing facilities in the United States and one in China. Our USA facilities are located in Pasadena, Texas; Bishop, Texas; and Spartanburg, South Carolina. Our China facility is located just outside Shanghai.

CrossChem's competitive advantage is in the employment of reactor and distillation specific assets to achieve our quality and cost targets while maintaining our social, ethical and environmental commitments.

Social, Ethical and Environmental Responsibilities

CrossChem observes the highest ethical standards at all times and display a concerned and responsible behavior towards our customers, employees and communities in which we do business.

CrossChem strives to eliminate all injuries, prevent adverse environmental and health impacts, reduce waste and emissions and promote resource conservation at every stage of the life cycle of our products. We find science-enabled, sustainable solutions for our customers, always managing our businesses to protect the environment and preserve natural resources both for today and future generations.
